

MathSpeak India 2015 International Conference and Exhibition “Teaching of Mathematics and Numeracy in 21st Century India” 7th February, Indore and 13th February Mumbai

MathSpeak is a series of international conferences for Maths Teachers . Further worldwide events are now being organised following the success of the first conferences in London in Autumn 2013 and Autumn 2014 and two further conferences in India in 2014, each to an audience of 200 Maths teachers,.

We are delighted to announce the next two Indian MathSpeak conferences that will examine issues with the teaching of Mathematics as diverse as assessment and pedagogy, professional standing of teachers, and the impact of technology on the classroom.

Promoted by the Education for Employability Foundation and supported by NCERT and MHRD these events will provide an exciting, radical programme for Education and Training in India, raising the expertise, effectiveness, professional development and standing of Maths Teaching across India. The conferences will bring expertise and experience from India and the rest of the world to drive forward Maths teaching and the skills of Maths teachers in to the 21st Century.

Goal:

To provide a forum for Mathematics teachers to share experience, see best practise and understand the latest developments in the teaching of Mathematics to the 14 to 19 cohort primarily but not exclusively.

Audience:

Mathematics teachers working in schools, colleges and similar institutions, those managing them, and those directly supporting them among management in schools and colleges, those training teachers, providers, awarding bodies, inspectorates, regulators, publishers, systems suppliers, trainers and recruiters.

Plans:

A target of over 200 practitioners are expected to attend each of the one day events. These next two Indian events will be in Mumbai and Indore. Further conferences are planned for major conurbations across India in 2015 and 2016.

Scope:

For delegates the conferences will cover the latest developments in teaching 14 to 19 Mathematics and Numeracy cohort including the delivery of formal school certification qualifications, Functional Skills, Stem Skills etc., areas of Continuing Professional Development as well as recent changes to Qualification specifications and delivery, and new technological developments, will be focus areas.

For sponsors, supporters and exhibitors the conference will provide organisations will an opportunity to meet the practitioners in Mathematics teaching and provide an efficient, effective and successful marketing opportunity

Structure of Conference:

The conference will feature plenary sessions with important, high profile speakers at the start and conclusion of the day, and parallel sessions through the day on subjects such as the Impact of Technology, Data and Assessment, Engagement & Curriculum, Mobil Technology. Each presentation will be given by expert, experienced professionals and there will be plenty of chance to participate in Q&A sessions, to talk to speakers and fellow participants and to share experience, know-how and ideas.

Why Now?

In the Mathematics arena we are seeing rapid changes in focus and support from National and Local government, the introduction of exciting new technology and growing expectations of stakeholders. This is leading to an urgent need to bring the mathematics community together to really understand and discuss these changes and how best to manage them. MathSpeak is a Mathematics conference that will appeal to teachers and school leaders and will address their real day to day needs and pressures.

MathSpeak is designed with practicing teachers and leaders at the core of our thinking and because of this it is a must attend event.

- Continuing and growing government focus on Mathematics and Numeracy
- Numbers of Mathematics teachers increasing, with a new, vibrant cohort of motivated staff looking to expand their skill base
- A period of rapid changes to qualifications and curriculum
- A changing marketplace in Maths teaching
- No comparable event

Why Us?

We are a team of proven practitioners with

- experience in delivering educational conferences and exhibitions for over 15 years
- include proven Mathematics teachers with wide network of contacts
- knowledge of and access to key players in the teaching and examination of Mathematics
- experience of working in Mathematics teaching and training in the UK and in India over many years

How can you be a part of **MathSpeak** INDIA 2015?

1. Sponsor – associate your organisation with the aims and objectives of MathSpeak – discuss with us a package to suit your needs.
2. Exhibit - directly reach the delegates to demonstrate your products and services
3. Speak - address either the whole or part of the audience at the MathSpeak events.
4. Market – market your products to the delegates through inserts and leaflets
5. Many other opportunities to discuss

Contact:

To be involved in this great opportunity to meet and engage with Maths Teachers and those managing them.
